Introduction

Our group have 4 members and those are binali, student-2, J.Thuwarakan, S.Nirahulan. binali allocated for student-1 roll, student-2 allocated for student-2 roll, I am allocated for student-3 roll and Nirakulan allocated for student-4 roll. Our web page is focus on tourism, so we create a website about tourism. Our website has several webpages and those are Home, Buying form, Feedback form, Quiz, Gallery and more. We use Html, Css, JavaScript for our website creation.

This report discus about how I create webpage with html, CSS, and JavaScript and how I apply UX principles for my course work with lot of screenshot and reports

1. Technical Discussion

I am allocated for creating a Quiz and student detail web pages.

Quiz

H,n,nead

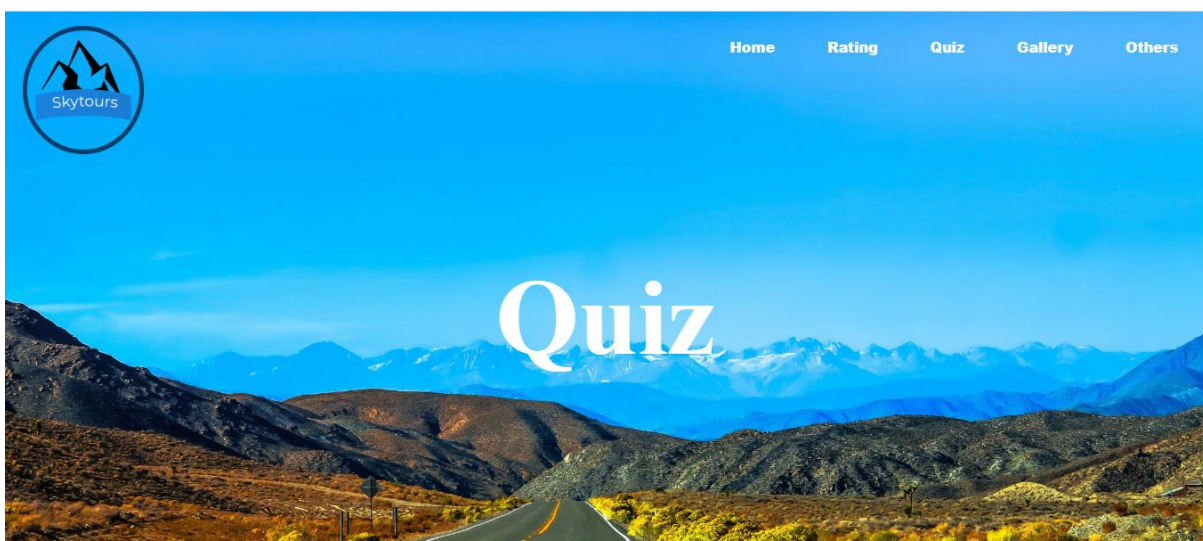

In my head part of html contain a title part and a link for my CSS style sheet. in the title part I gave Quiz for my title

```
<head>
  <title> Quiz </title>
  <link rel="stylesheet" href="../css/Quiz.css">
</head>
```

Body

The body part is divided in to four parts those are **header, section, footer, script** in the header part contain the codes of my web page heading part my section part contain the quiz part footer for end part and script part contain the javascript part for do some events in my webpage

Header: -

In here I have a background-image, a navigationbar, heading, and my logo. I use unordered list for creating navigation bar. My navigation bar contains a drop-down menu in its last part, for

that I put a set of unordered lists to last element of my first list part

```
<li class="nav-right"> <a href="https://www.youtube.com/">Home</a> </li>
<li class="nav-right"> <a href="https://www.youtube.com/">Rating</a> </li>
<li class="nav-right"> <a href="https://www.youtube.com/">Quiz</a> </li>
<li class="nav-right"> <a href="https://www.youtube.com/">Gallery</a> </li>
<li class="nav-right"> <a href="https://www.youtube.com/">Others</a>
    <ul>
        <li><a href="">About</a></li>
        <li><a href="">India</a></li>
        <li><a href="">France</a></li>
        <li><a href="">Sri Lanka</a></li>
        <li><a href="">London</a></li>
    </ul>
</li>
</ul>
```

above code is used for creating menu bar , add logo and css part of menu bar :-

```

#nav-bar .container img{
  float:left;
  margin:8px;
}
#nav-bar .container ul{
  float:right;
}
#nav-bar .container ul li{
  float:left;
  list-style-type:none;
}
#nav-bar .container a{
  text-decoration:none;
  color:white;
  font-family:arial black;
  font-size:16px;
}
#nav-bar .container ul li a{
  display:block;
  padding:16px;
  margin:12px;
  margin-right:15px;
  margin-bottom:2px;
}
#nav-bar .container ul li a:hover{
  background-color:white;
  color:black;
  border-radius:36px;
}
.container ul ul {
  display :none;
  position:absolute;
}
.container ul li:hover > ul{
  display:block;
}

```

```

]header{
  background:url("../img/pic-13.jpg") ;
  background-size:cover;
  background-repeat:no-repeat;
  width:100%;
  height:600px;
  background-position:center;
}

```

In here I add some css styling to my header part. **Background:url()**; this code use to set background-image for my header section.

section

my section part contained 2 part one is Quiz and another one is instruction part for quiz .

```
<div id="partA">
  <p> Welcome! to our Quiz programme </p>
  <div id="instructions">
    <h1> Instructions </h1>
    <ul>
      <li>This Quiz contain 10 multiple choice questions and you want answer all 10 question if you not give a answer to one question we consider that also <span> a wrong answer</span>
      <li> you will get 2 marks for each correct answer, and -1 for each wrong answer.</li>
      <li>This programme is a time limited programme. you only got 5 minutes for submit your answers</li>
      <li>if you got correct for Q1 the color of the Q1 text will turn green if it is wrong it will turn red </li>
      <li>background color will change up to your marks :-
        <ol>
          <li>Score is 0 to 5 background color = red</li>
          <li>Score is 6 to 14 background color = yellow</li>
          <li>Score is above 14 background color = green</li>
        </ol>
      </li>
    </ul>
  </div>
</div>
```

In here I create a div tag and add contents to it with unordered list. this part gives instructions to the users for how to do quiz part.

Then I create a <div> tag and put my quiz part (functions part given below) for creating quiz part I use form element. A form part has question part, submit button part, and show answers part.

```
<div id = "Question_1" >
  <label id="Q1"> Q1) what is the capital of china ? </label><br>
  <input type="radio" id="A1" name="Q1" value="1">
  <label for="A1">Shanghai</label><br>
  <input type="radio" id="A2" name="Q1" value="2">
  <label for="A2">Beijing</label><br>
  <input type="radio" id="A3" name="Q1" value="3">
  <label for="A3">Shenzhen</label><br>
  <input type="radio" id="A4" name="Q1" value="4">
  <label for="A4">Chengdu</label>
</div>
```

I use radio button for answers and use labels for show question. I give different values for each radio buttons and give same name for set of radio buttons which contain answers for one question (I use this way for ten times to create 10 questions)

```
<div class="button">
  <button type="Button" id="submit" > Submit </button>
</div>
```

I use < button> tag to create the button this button will use to control events

```
<div class="Answers">
  <p id="score"></p>
  <p id="count"></p>
  <p id="time"></p>
</div>
```

this part help to show the final answers for quiz

1)instruction part

Welcome! to our Quiz programme

Instructions

- This Quiz contain 10 multiple choice questions and you want answer all 10 question if you not give a answer to one question we consider that also a wrong answer
- you will get 2 marks for each correct answer, and -1 for each wrong answer.
- This programme is a time limited programme. you only got 5 minutes for submit your answers
- if you got correct for Q1 the color of the Q1 text will turn green if it is wrong it will turn red
- background color will change up to your marks :-
 1. Score is 0 to 5 background color = red
 2. Score is 6 to 14 background color = yellow
 3. Score is above 14 background color = green

2) Quiz part (not full part)

Q1) what is the capital of china ?

- ☐ Shanghai
- ☐ Beijing
- ☐ Shenzhen
- ☐ Chengdu

Q2) Which is the longest river in the world?

- ☐ Amazon
- ☐ Yangtze River
- ☐ Nile
- ☐ Mississippi

Q3) Which city is the largest city in the world?

- ☐ Manilam
- ☐ Jakarta
- ☐ Delhi
- ☐ Tokyo

Q4) largest country in the world ?

- ☐ Russia
- ☐ India
- ☐ Canada
- ☐ China

Q5) How many tourists visit Sri Lanka each year?

to search

3) button

Submit

4) answer part

your total score is = 17

you got 9 out of 10

you took almost 100 Seconds

Script

for creating a quiz programme first, we want to find which radio button is click by the user, for that I create a JavaScript function called **"getAnswer"**. This function gets the radio buttons by its name that's why I gave a same name for all answer radio buttons. In the function first it will get the number of radio button and I use a for loop for check each radio buttons and find which radio button is checked. For that I use a "if" condition and checked Property together. Finally, this function returns the checked radio buttons value.

```
function getAnswer(radioArray) {
    var i;
    for (i = 0; i < radioArray.length; i++){
        if (radioArray[i].checked){
            return radioArray[i].value;
        }
    }
    return "";
}
```

document.getElementById("submit").addEventListener("click", Quiz) this code used for creating a event listener for my Quiz function. This function is the main function of my code and it will help to calculate the score and do some events in my webpage like change the background color, change font color and more

```
var total_correct = 0;
var total_wrong = 0;

var userAnswer_Q1 = getAnswer(document.getElementsByName("Q1"));
if (userAnswer_Q1 == "2"){
    total_correct ++;
    document.getElementById("Question_1").style.color = "#00ff00";
}else{
    total_wrong ++;
    document.getElementById("Question_1").style.color = "red";
}
```

In here I create 2 variables for calculate the total count of correct answers and wrong answers. Then I use a variable named **userAnswer_Q1** for save the value of user input (for that I use my function which is created in the start) then I check if the user answer is same with the actual answer or not for that I use if-else condition. If user answer is correct, I increase the value of total_correct by 1 and change the question font color to green else I increase total_wrong value by one and change the font color to red. I repeat this method for ten times to check all ten questions.

the programme wants to give 2 marks for each correct answer and -1 for each wrong answer. So, I multiply the **total_correct** by 2 and subtracting by total count of **total_wrong** . then I

create a variable called `total_score` and save the final answer. The lowest marks of the quiz is 0 so I use if condition. If score is less, then 0 this condition set the score to 0 otherwise it will change anything.

```
var total_score = 2 * total_correct - total_wrong ;
if(total_score < 0){
    total_score = 0 ;
}
```

Another task is changing the background colors according to the final score. For that I use if-else condition.

```
if( total_score < 6){
    document.getElementById("head").style.backgroundColor = "#ff0000";
    document.getElementById("Question").style.backgroundColor = "white";
    document.getElementById("partA").style.color = "red";
    document.getElementById("instructions").style.border = "2px solid red";
}
else if ( total_score > 5 && total_score < 15){
    document.getElementById("head").style.backgroundColor = "#ffff00";
    document.getElementById("Question").style.backgroundColor = "white";
    document.getElementById("partA").style.color = "#ffff00";
    document.getElementById("instructions").style.border = "2px solid #ffff00";
}
else{
    document.getElementById("head").style.backgroundColor = "#00ff00";
    document.getElementById("Question").style.backgroundColor = "white";
    document.getElementById("partA").style.color = "#00ff00";
    document.getElementById("instructions").style.border = "2px solid #00ff00";
}
```

If score is less then 6 the background color want to change red, if it is above 14 it will change green otherwise it will change yellow. And it will change the unwanted text font color also. Then I want to set a timer to my Quiz. For that I use **`window.setTimeout()`**; method

```
var timer = window.setTimeout("Quiz()", 300000);
var Start_time = new Date();
var alarm = window.setTimeout("alert_user()", 150000)
```

```
var End_time= new Date();
window.clearTimeout(timer);
window.clearTimeout(alarm);

var total_time = End_time - Start_time;
```

```
function alert_user(){
    window.clearTimeout(alarm);
    alert("Hurry up \nonly 2.5 minutes is left");
}
```

In here I set 5 minutes for my quiz. And I create a function called **alert_user** this function will alert user if half of the time is finished.

Then I want to show all result. For that I use **document.getElementById("id").innerHTML** method to set text to that places.

```
document.getElementById("score").innerHTML = "your total score is = "+ total_score;  
document.getElementById("count").innerHTML = "you got " + total_correct + " out of 10";  
if(total_time < 300000){  
    document.getElementById("time").innerHTML = "you took almost " + Math.round(total_time/1000) +" Seconds" ;  
}else{  
    alert("Sorry \n Your time is over");  
}
```

Inhere I set total score, total count of correct answer and total time took for finished quiz. If you finished before 5 minutes otherwise window alert you for that I use if condition.

Student Detail page

Student detail part also contain header, section, footer parts. I use the same css and html for header and footer part (same as Quiz part). So, we see the section part only in this topic.

```

<section>
  <div class="notes">
    <p> This web page provide details about the Students who works on our group project </p>
  </div>
  <div class="grid-container">
    <div class="student-1">
      <div onmouseover="mouseON_1(std_1)" onmouseout="mouseOUT_1(std_1)" >
        
      </div>
      <p id="std_1"></P>
    </div>
    <div class="student-2">
      <div onmouseover="mouseON_2(std_2)" onmouseout="mouseOUT_2(std_2)">
        
      </div>
      <p id="std_2"></P>
    </div>
    <div class="student-3">
      <div onmouseover="mouseON_3(std_3)" onmouseout="mouseOUT_3(std_3)">
        
      </div>
      <p id="std_3"></P>
    </div>
    <div class="student-4">
      <div onmouseover="mouseON_4(std_4)" onmouseout="mouseOUT_4(std_4)">
        
      </div>
      <p id="std_4"></P>
    </div>
  </div>
</section>

<footer>

```

I add 4 images and 4 text filed in my html. And use grid pane to arrange the 4 images in one row.

```

.grid-container {
  display: grid;
  grid-template-areas:
    'pic-1 pic-2 pic-3 pic-4 ';
  margin-left: 100px;
}

```

In here I use **grid-template-areas** method to achieve this task. When the user moves the mouse over one picture, the details of that member should be displayed in an area on the page this is another task for that I use Java Script. I create two functions for each image. And I gave **onmouseover** and **onmouseout** commands to images. And specify functions.

```

<div class="student-2">
  <div onmouseover="mouseON_2(std_2)" onmouseout="mouseOUT_2(std_2)">
    
  </div>
  <p id="std_2"></P>
</div>
<!--
function mouseON_1(obj) {
  obj.innerHTML = "Name = J.Thuwarakan <br>Role = Student 01"
}
function mouseOUT_1(obj) {
  obj.innerHTML = ""
}
-->

```

in here I create the functions **called mouseON_1(obj)** and **mouseOUT_1(obj)** and use obj.innerHTML method to specify there name and roll.

Discussion of UI and application of UX principles

3.1 Information architecture

a. Design

I create 4 folders called html, CSS, Java Script and img and put all pages into that folders. Every web pages of our website contained navigation bar in the top of our web page and our footer part also contain some navigation parts. Main navigation bar contains normally 5 part first one is for home next one is for rating after that quiz then gallery finally other. The **other** part is dropdown menu it is contain 4 country part and the about us part. And my part b section has one extra component called mode this will help you to change your page mode dark to light. And my footer part is also containing the link to editor page, country part, main page link and bookmarks for page parts.

above part is my navigation parts and every web page have a heading and that heading will help you to find which page you're in. for creating navigation bar we use uncorded list method.

The code for creating navigation part

```
<nav id="nav-bar">
  <div class="container">
    
    <ul>
      <li class="nav-right"> <a href="https://www.youtube.com/">Home</a> </li>
      <li class="nav-right"> <a href="https://www.youtube.com/">Rating</a> </li>
      <li class="nav-right"> <a href="Quiz.html">Quiz</a> </li>
      <li class="nav-right"> <a href="">Gallery</a> </li>
      <li class="nav-right"> <a href="#">Others</a>
        <ul>
          <li><a href="about_us.html">About</a></li>
          <li><a href="project.html">India</a></li>
          <li><a href="">France</a></li>
          <li><a href="">Sri Lanka</a></li>
          <li><a href="">Londan</a></li>
        </ul>
      </li>
    </ul>
  </div>
</nav>
```

In here I use some hover methods to do some mouse on action on navigation bar.

Css part of navigation bar

```
#nav-bar .container img{
    float:left;
    margin:8px;
}
#nav-bar .container ul{
    float:right;
}
#nav-bar .container ul li{
    float:left;
    list-style-type:none;
}
#nav-bar .container a{
    text-decoration:none;
    color:white;
    font-family:arial black;
    font-size:16px;
}
#nav-bar .container ul li a{
    display:block;
    padding:16px;
    margin:12px;
    margin-right:15px;
    margin-bottom:2px;
}
#nav-bar .container ul li a:hover{
    background-color:white;
    color:black;
    border-radius:36px;
}
.container ul ul {
    display :none;
    position:absolute;
}
.container ul li:hover > ul{
    display:block;
}
/*-----
```

I use hove method in here

Code for footer part

```

<footer id="page-footer">
  <div class="links-container">
    <div class="group-links">
      <h3 class="links-heading" id="on-this-page">About Us</h3>
      <a href="#nav-bar" class="links" id="head-link">Heading</a>
      <a id="imgs-link" class="links" href="#c1">Pictures</a>

    </div>
    <div class="group-links">
      <h3 class="links-heading" id="partB-page">Famous Places</h3>
      <a href="#" class="links" id="uk-link">UK</a>
      <a href="#" class="links" id="cost-link">Costarica</a>
      <a href="#" class="links" id="france-link">France</a>
      <a href="project.html" class="links" id="india-link">India</a>

    </div>
    <div class="group-links">
      <h3 class="links-heading" id="main-page">Main Pages</h3>
      <a href="#" class="links" id="home-link">Home</a>
      <a href="Quiz.html" class="links" id="quiz-link">Quiz</a>
      <a href="editor.html" class="links" id="editor-link">Editors</a>
      <a href="#" class="links" id="svg-link">Website Tree</a>

    </div>
    <div class="author">
      <h4>Created By: J.Thuwarakan &copy;2020 </h2>
    </div>
  </div>
</footer>

```

Css part for footer

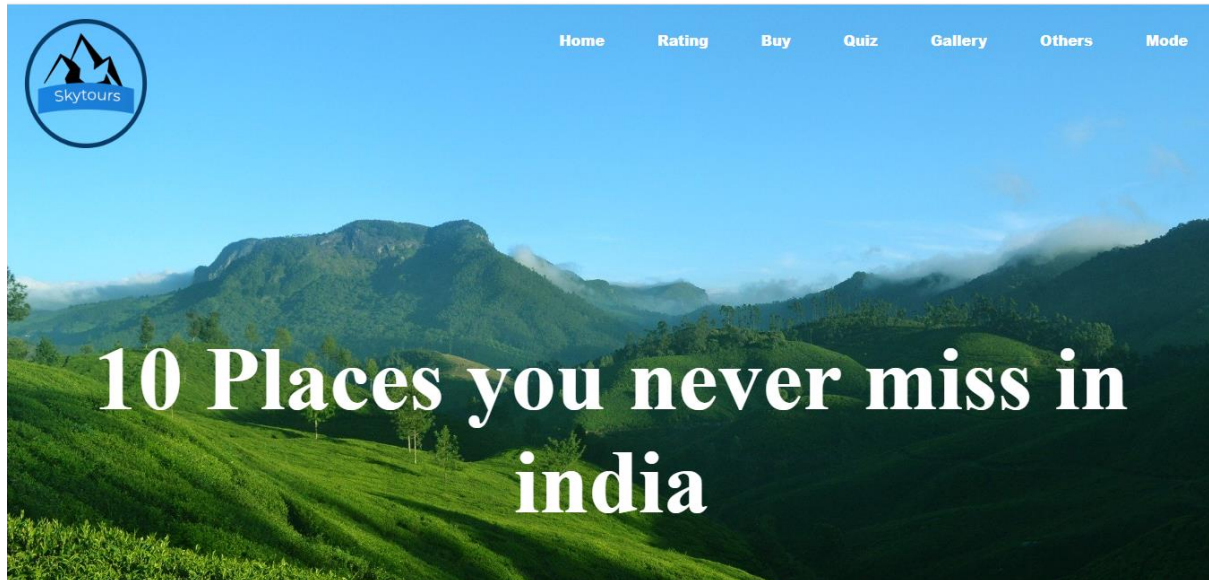

Add my file names in href to connect my parts

b. Code to achieve good Information architecture

3.2 Colour balance/composition/graphics/consistency

a. Design

our website is about truism, so I use blue and green tone images for header part and our background color is normally white and fonts in black color. in my header parts I use white color font because most of my header part background images are light blue and green so white fonts are increase the readability.

This is my part-b section header part this part contains a navigation bar, heading for my web page, logo and background image. Mostly background image have 2 colors one is green and other one is light blue. The heding font color is white and the background color is green. This is easy to read. And the navigation bar is white and the background color is light blue. My logo also same like this.

1.Mysore Palce

Mysore palace is the one of the famous historical place in India. Mysore palace is a royal residence of Wadiyar royal family in late 1920s and it is a famous tourist spot in now days. This palace located in Karnataka state and center place of mysore city. the architectural style of this palace is "indo-saracenic" style .The European languages are members of the same family. Their separate existence is a myth. For science, music, sport, etc, Europe uses the same vocabulary. The languages only differ in their grammar, their pronunciation and their most

This web page is Symmetrical Balance web page most of the contents are in the centre. in here this web page describe about 10 places in india and every place are in one by one. And my website has a night mode option also.

Mysore palace is the one of the famous historical place in India. Mysore palace is a royal residence of Wadiyar royal family in late 1920s and it is a famous tourist spot in now days. This palace located in Karnataka state and center place of mysore city. the architectural style of this palace is "indo-saracenic" style. The European languages are members of the same family. Their separate existence is a myth. For science, music, sport, etc, Europe uses the same vocabulary. The languages only differ in their grammar, their pronunciation and their most common words. Everyone realizes why a new common language would be desirable: one could refuse to pay expensive translators. To achieve this, it would be necessary to have uniform grammar, pronunciation and more common words. If several languages coalesce, the grammar of the resulting language is more simple and regular than that of the individual languages. The. it is start to built in 1897 and this works end in 1912. It is a most famous tourist spot after Taj Mahal with more 6 million annual visitors. Mysore Palace Entry Fees for adults is 40 rupees. for Children(10-18 Yrs) is 10 rupees.free for Students (Letter from School is Required). 200 per person for Foreign Tourists (Audio Kit Included). for mor details

2.Taj Mahal

b. Code to achieve good colour balance & ensure consistency

#heading{

text-align:center;

padding-top:360px;

color:white;

font-family:Linotte;

font-size:50px;

}

I use **color:white;** code to change heading font color .

<nav id="nav-bar">

<div class="container">

<li class="nav-right"> Home

```

<li class="nav-right"> <a href="form.html">Rating</a> </li>

<li class="nav-right"> <a href="Art & craft1.html">Buy</a>
</li>

<li class="nav-right"> <a href="Quiz.html">Quiz</a> </li>

<li class="nav-right"> <a
href="https://www.youtube.com/">Gallery</a> </li>

<li class="nav-right"> <a href="#">Others</a>

<ul>

<li><a
href="about_us.html">About</a></li>

<li><a
href="project.html">India</a></li>

<li><a href="">France</a></li>

<li><a
href="Costarica.html">Costarica</a></li>

<li><a
href="Uk.html">London</a></li>

</ul>

</li>

<li class="nav-right"><a href="#">Mode </a>

<ul>

<li onclick="night_mode()"><a
href="#">Night Mode</a></li>

<li onclick="normal()"><a
href="#">Normal Mode</a></li>

</ul>

</li>

</ul>

```

</div>

</nav>

This code help to structure the navigation bar and I use bunch of div tags to structure my details part. It will help to order the content one by one

<div class="place">

<h1 class="head"> 1.Mysore Palce </h1>

<p>Mysore palace is the one of the famous historical place in India.

Mysore palace is a royal residence of Wadiyar royal family in late 1920s and it is a famous tourist spot in now days.

This palace located in Karnataka state and center place of mysore city. the architectural style of this palace is "indo-saracenic" style .The European languages are members of the same family. Their separate existence is a myth.

For science, music, sport, etc, Europe uses the same vocabulary. The languages only differ in their grammar, their pronunciation and their most common words. Everyone realizes why a new common language would be desirable: one could refuse to pay expensive translators.

To achieve this, it would be necessary to have uniform grammar, pronunciation and more common words. If several languages coalesce, the grammar of the resulting language is more simple and regular than that of the individual languages. The.

it is start to built in 1897 and this works end in 1912. It is a most famous tourist spot after Taj Mahal with more 6 million annual visitors.

Mysore Palace Entry Fees for adults is 40 rupees. for Children(10-18 Yrs) is 10 rupees.free for Students (Letter from School is Required).

200 per person for Foreign Tourists (Audio Kit Included). for mor details Click here

Heading

3.3 Typography / consistency

a. Design

I use Arial, Arial black, Linotte and Helvetica font families in my webpages. Normally I use arial black for headings, footer parts and my quiz part. Helvetica for my part b section part. This font is sans-serif typeface, so they have more readability. I use different font-size for headings, sub-headings and paragraphs for easy to find different. I use 14px to 17px for my paragraphs, 35px for sub-heading and 50 px for headings. Mostly my line space is default one. mostly my paragraphs are symmetrical balance paras. And each lines of my paragraphs are left aligned because Left aligned text is easier to read.

Mysore palace is the one of the famous historical place in India. Mysore palace is a royal residence of Wadiyar royal family in late 1920 and it is a famous tourist spot in now days. This palace located in Karnataka state and center place of mysore city. the architectural styl this palace is "indo-saracenic" style .The European languages are members of the same family. Their separate existence is a myth. For science, music, sport, etc, Europe uses the same vocabulary. The languages only differ in their grammar, their pronunciation and their r common words. Everyone realizes why a new common language would be desirable: one could refuse to pay expensive translators. To achieve this, it would be necessary to have uniform grammar, pronunciation and more common words. If several languages coalesce, t grammar of the resulting language is more simple and regular than that of the individual languages. The. it is start to built in 1897 and ti works end in 1912. It is a most famous tourist spot after Taj Mahal with more 6 million annual visitors. Mysore Palace Entry Fees for adu is 40 rupees. for Children(10-18 Yrs) is 10 rupees.free for Students (Letter from School is Required). 200 per person for Foreign Tourist (Audio Kit Included). for mor details Click here

This my one example and this screen shot taken from my part b section. This paragraph is symmetrical and left aligned. I use 17px for font size and font-family is Helvetica.

b. Code to achieve good typography / consistency

#heading{

text-align:center;

padding-top:360px;

color:white;

font-family:Linotte;

font-size:50px;

}

The code for my heading part I use font-family, font-size and text-align

The code of paragraphs

.place p{

margin-left:150px;

margin-right:150px;

font-family:Helvetica;

font-size:17px;

}

3.5 Accessibility (graphics/forms)

a. Graphical elements - Design/Code

my web page contained a logo of our website in the left-top corner. My webpages have a bookmarks section in the footer part for important part of that webpage. My quiz page have a submit button to submit answers.

Button

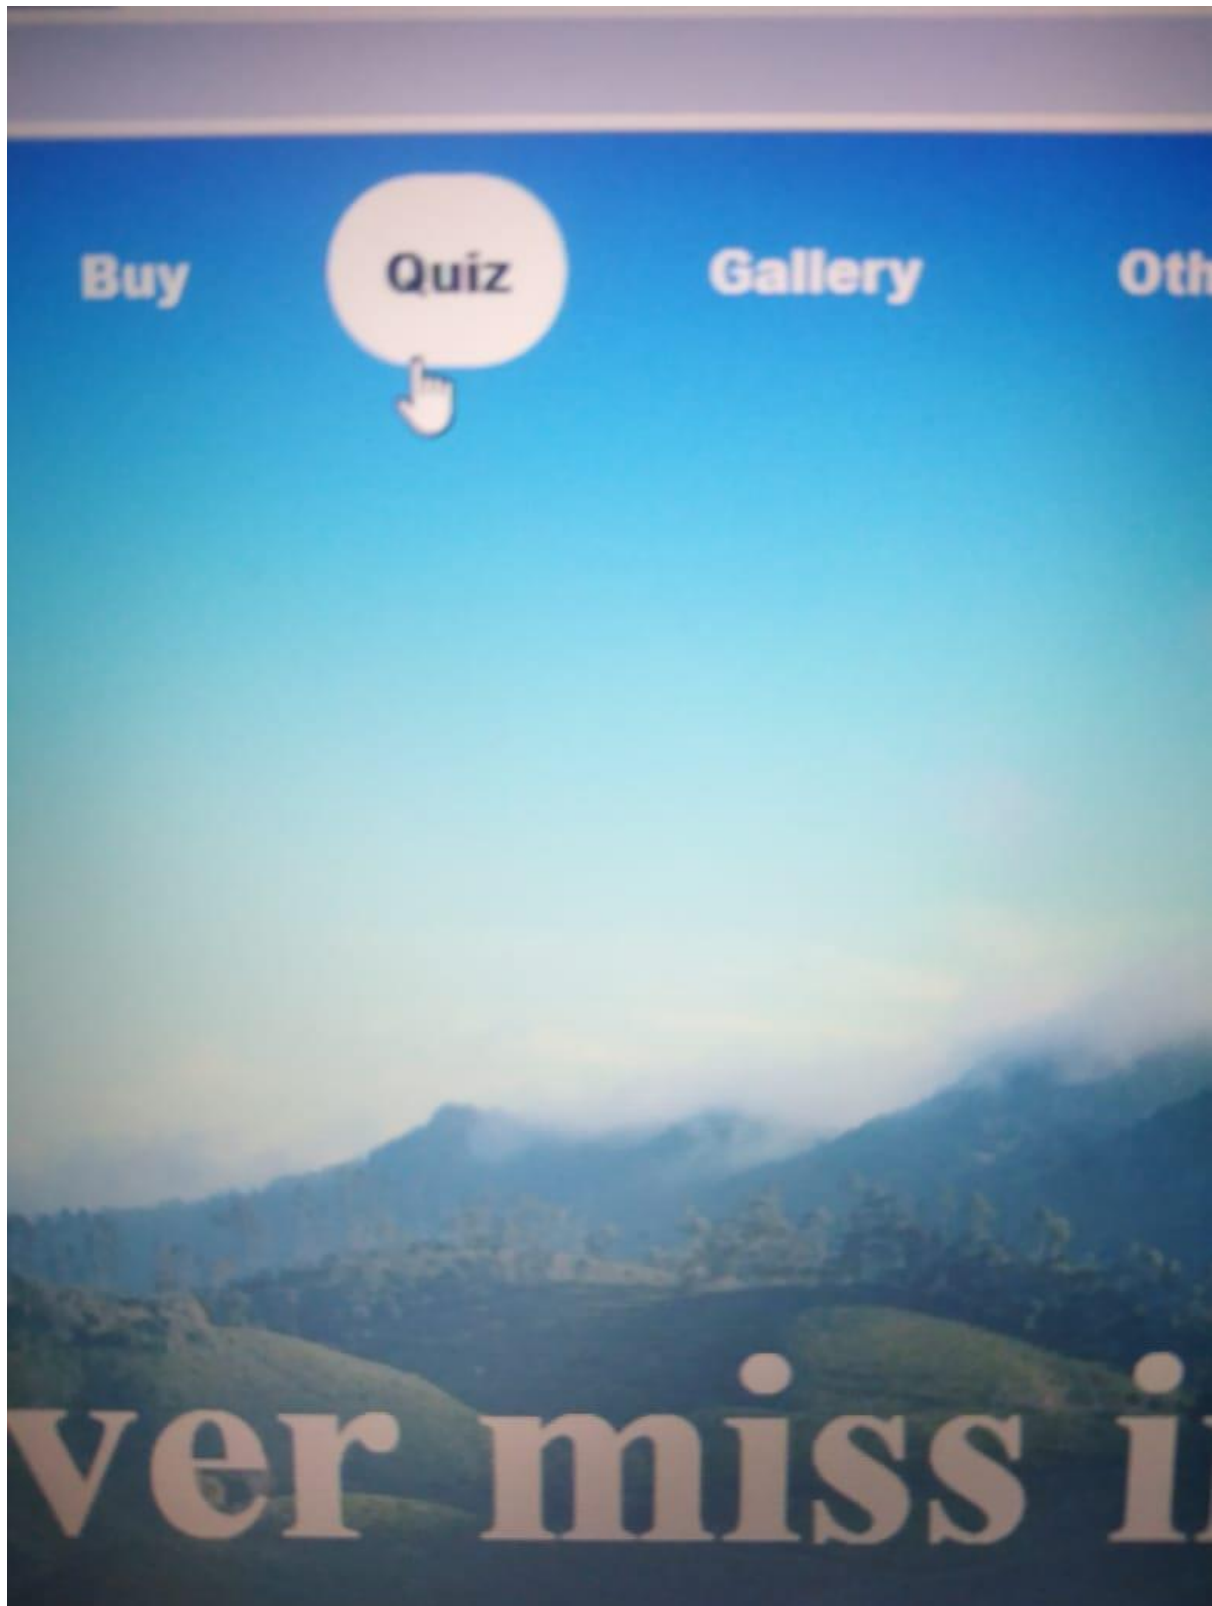

also I add night mode with the help of java script to make more readability

Mysore palace is the one of the famous historical place in India. Mysore palace is a royal residence of Wadiyar royal family in late 1920s and it is a famous tourist spot in now days. This palace located in Karnataka state and center place of mysore city. the architectural style of this palace is "indo-saracenic" style .The European languages are members of the same family. Their separate existence is a myth. For science, music, sport, etc, Europe uses the same vocabulary. The languages only differ in their grammar, their pronunciation and their most common words. Everyone realizes why a new common language would be desirable: one could refuse to pay expensive translators. To achieve this, it would be necessary to have uniform grammar, pronunciation and more common words. If several languages coalesce, the grammar of the resulting language is more simple and regular than that of the individual languages. The. it is start to built in 1897 and this works end in 1912. It is a most famous tourist spot after Taj Mahal with more 6 million annual visitors. Mysore Palace Entry Fees for adults is 40 rupees. for Children(10-18 Yrs) is 10 rupees.free for Students (Letter from School is Required). 200 per person for Foreign Tourists (Audio Kit Included). for mor details

2.Taj Mahal

I use some hover effects in my navigation bar

3.6 Error prevention and recovery

a. Design

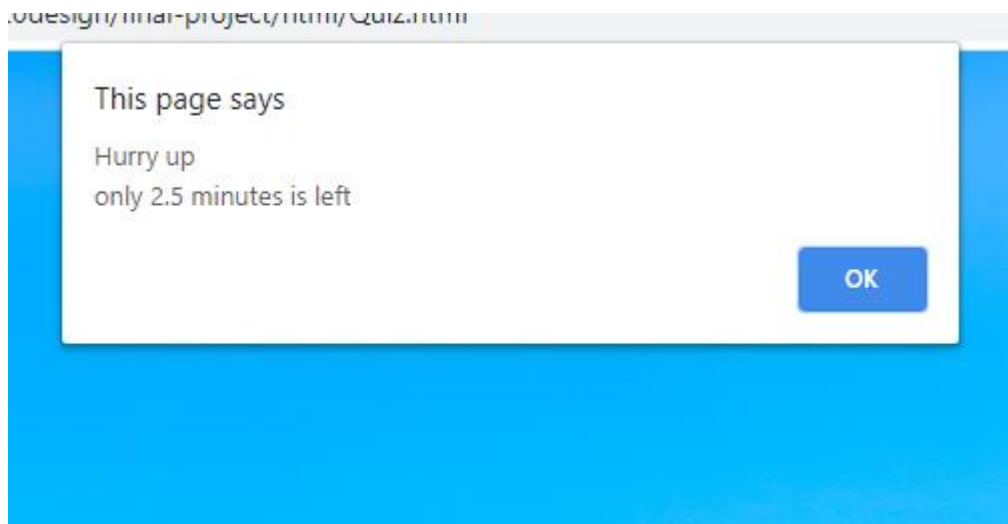

Welcome! to our Quiz programme

Instructions

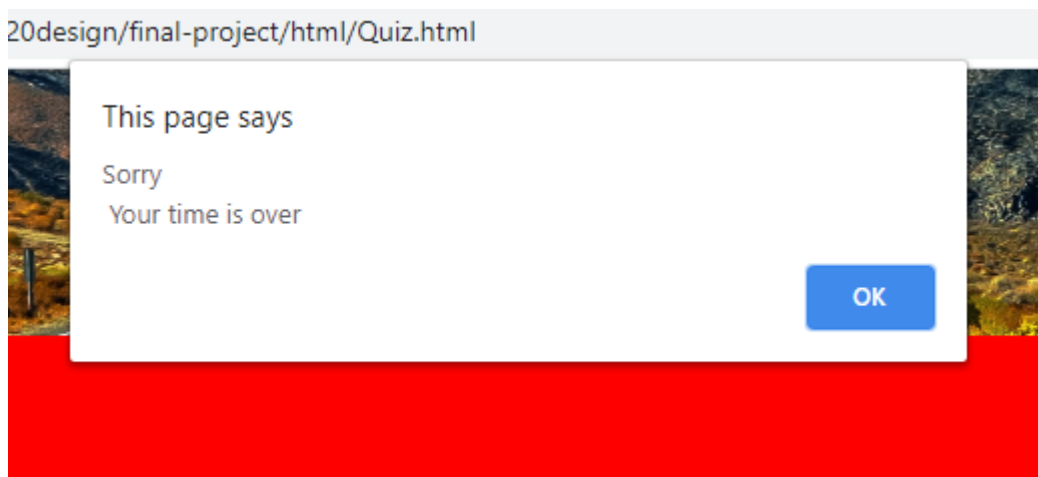

- This Quiz contain 10 multiple choice questions and you want answer all 10 question if you not give a answer to one question we consider that also a wrong answer
- you will get 2 marks for each correct answer, and -1 for each wrong answer.
- This programme is a time limited programme. you only got 5 minutes for submit your answers
- if you got correct for Q1 the color of the Q1 text will turn green if it is wrong it will turn red
- background color will change up to your marks :-
 1. Score is 0 to 5 background color = red
 2. Score is 6 to 14 background color = yellow
 3. Score is above 14 background color = green

this is my instruction part for quiz. This instruction will help users to successfully finish the quiz.

I also have an alert function to alert users when half of the time is finished.

I have another function for alert user when the time finished

Also, when you finished the quiz the color of your questions will change. It's depended on your answers.

Q9) What is the deepest lake in the world?

- ☐ Caspian Sea
- ☒ Lake Baikal
- ☐ Lake Malawi
- ☐ San Martín Lake

Q10) Where is the Eiffel Tower located exactly?

- ☐ France
- ☒ India
- ☐ London
- ☐ China

If your answer is correct the color change black to green. If it's wrong the color will change black to red.

b. Code to address error prevention and recovery

<div class="place">

<h1 class="head"> 5. Agra Fort </h1>

Agra Fort is a historical fort in the city of Agra in India. It was the main residence of the emperors of the Mughal Dynasty until 1638, when the capital was shifted from Agra to Delhi.

Before capture by the British, the last Indian rulers to have occupied it were the Marathas. In 1983, the Agra fort was inscribed as a UNESCO World Heritage site. It is about 2.5 km northwest of its more famous sister monument, the Taj Mahal.

The fort can be more accurately described as a walled city. Built as a military structure in 1565 by Emperor Akbar with later additions by Shah Jahan, the stunning Agra Fort (also known as Agra's Red Fort) is an interesting mix of both Hindu and Muslim influences.

This palace located in Karnataka state and center place of mysore city. the architectural style of this palace is "indo-saracenic" style .The European languages are members of the same family. Their separate existence is a myth.

For science, music, sport, etc, Europe uses the same vocabulary. The languages only differ in their grammar, their pronunciation and their most common words. Everyone realizes why a new common language would be desirable: one could refuse to pay expensive translators.

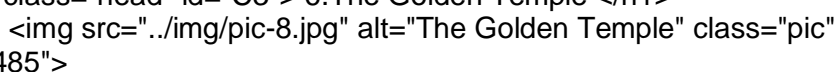

To achieve this, it would be necessary to have uniform grammar, pronunciation and more common words. If several languages coalesce, the grammar of the resulting language is more simple and regular than that of the individual languages. The.

it is start to built in 1897 and this works end in 1912. It is a most famous tourist spot after Taj Mahal with more 6 million annual visitors.

Located a little more than two kilometers from the Taj Mahal, the fort is entered through Amar Singh Gate with its low outer wall and dogleg design built to confuse attackers. Once inside, you'll see two large interlinked sandstone buildings, Akbari Mahal and Jahangiri Mahal, the largest private residence in the complex.

6.The Golden Temple

The Golden Temple

The Gurdwara is built around a man-made pool (sarovar) that was completed by the fourth Sikh Guru, Guru Ram Das in 1577. Guru Arjan, the fifth Guru of Sikhism, requested Sai Mir Mian Mohammed, a Muslim Pir of Lahore, to lay its foundation stone in 1589. In 1604, Guru Arjan placed a copy of the Adi Granth in Harmandir Sahib, calling the site Ath Sath Tirath. The Gurdwara was repeatedly rebuilt by the Sikhs after it became a target of persecution and was destroyed several times by the Muslim armies from Afghanistan and the Mughal Empire. The army led by Ahmad Shah Abdali, for example, demolished it in 1757 and again in 1762, then filled the pool with garbage and blood of cows.

This palace located in Karnataka state and center place of mysore city. the architectural style of this palace is "indo-saracenic" style .The European languages are members of the same family. Their separate existence is a myth.

For science, music, sport, etc, Europe uses the same vocabulary. The languages only differ in their grammar, their pronunciation and their most common words. Everyone realizes why a new common language would be desirable: one could refuse to pay expensive translators.

To achieve this, it would be necessary to have uniform grammar, pronunciation and more common words. If several languages coalesce, the grammar of the resulting language is more simple and regular than that of the individual languages. The.

it is start to built in 1897 and this works end in 1912. It is a most famous tourist spot after Taj Mahal with more 6 million annual visitors.

Maharaja Ranjit Singh after founding the Sikh Empire, rebuilt it in marble and copper in 1809, overlaid the sanctum with gold foil in 1830. This has led to the name the Golden Temple. for mor details Click here

<h1 class="head" id="C5"> 10.Periyar National Park</h1>

<p>One of South India's most popular tourist attractions, Periyar National Park and Wildlife Sanctuary is centered around a lake built by British engineers in 1895 for irrigation and to provide water to the city of Madurai.

Established in 1934, this beautiful park is home to numerous species of mammals, including a large free-roaming Indian elephant population, wild boar, otters, the lion-tailed macaque, and more than 20 Bengal tigers. Bird watching is a popular activity with frequent sightings of species such as darters, storks, kingfishers, hornbills, and racket-tailed drongos,

Taj mahal is world famous tourist spot. the expert mention taj mahal is a crown of palace but most of the youngsters call it as a symbol of love because it was built by the Mughal emperor shah jahan for his loveable wife Mumtaz mahal but actually Taj mahal is a tomb of queen Mumtaz. It is located in ancient city Agra. Ustet Ahmad Lahauri is the main architect of taj mahal. The cost of taj mahal is 32 million in 1653. This palace located in Karnataka state and center place of mysore city. the architectural style of this palace is "indo-saracenic" style. The European languages are members of the same family. Their separate existence is a myth. For science, music, sport, etc, Europe uses the same vocabulary. The languages only differ in their grammar, their pronunciation and their most common words. Everyone realizes why a new common language would be desirable: one could refuse to pay expensive translators. To achieve this, it would be necessary to have uniform grammar, pronunciation and more common words. If several languages coalesce, the grammar of the resulting language is more simple and regular than that of the individual languages. The. it is start to built in 1897 and this works end in 1912. It is a most famous tourist spot after Taj Mahal with more 6 million annual visitors. Taj mahal is one of the wonder of new 7 wonders of the world. for mor details [Click here](#)

3.The Red Fort

Red for in the capital city of India Delhi. This fort is the main residence for most of the Mughal emperors like shah Jahan. It was constructed between May 1639 and April 1648. it took almost 8 years and 10months for build. This palace located in Karnataka state and center place of mysore city. the architectural style of this palace is "indo-saracenic" style. The European languages are members of the same family. Their separate existence is a myth. For science, music, sport, etc, Europe uses the same vocabulary. The languages only differ in their grammar, their pronunciation and their most common words. Everyone realizes why a new common language would be desirable: one could refuse to pay expensive translators. To achieve this, it would be necessary to have uniform grammar, pronunciation and more common words. If several languages coalesce, the grammar of the resulting language is more simple and regular than that of the individual languages. The. it is start to built in 1897 and this works end in 1912. It is a most famous tourist spot after Taj Mahal with more 6 million annual visitors. It is built by red sandstone that is the reason of its red color. Independence Day celebration held on here. It is the one of the tourist attractions of India . for mor details [Click here](#)

4.The Ellora Caves

Ellora is a UNESCO World Heritage Site located in the Aurangabad district of Maharashtra, India. It is one of the largest rock-cut

monastery-temple cave complexes in the world featuring Hindu, Buddhist and Jain monuments, and artwork, dating from the 600–1000 CE period. There are over 100 caves at the site, all excavated from the basalt cliffs in the Charanandri Hills, 34 of which are open to public. These consist of 12 Buddhist (caves 1–12), 17 Hindu (caves 13–29) and 5 Jain (caves 30–34) caves, each group representing deities and mythologies prevalent in the 1st millennium CE, as well as monasteries of each respective religion. This palace located in Karnataka state and center place of mysore city. the architectural style of this palace is "indo-saracenic" style. The European languages are members of the same family. Their separate existence is a myth. For science, music, sport, etc, Europe uses the same vocabulary. The languages only differ in their grammar, their pronunciation and their most common words. Everyone realizes why a new common language would be desirable: one could refuse to pay expensive translators. To achieve this, it would be necessary to have uniform grammar, pronunciation and more common words. If several languages coalesce, the grammar of the resulting language is more simple and regular than that of the individual languages. The. it is start to built in 1897 and this works end in 1912. It is a most famous tourist spot after Taj Mahal with more 6 million annual visitors. for mor details [Click here](#)

5. Agra Fort

Agra Fort is a historical fort in the city of Agra in India. It was the main residence of the emperors of the Mughal Dynasty until 1638, when the capital was shifted from Agra to Delhi. Before capture by the British, the last Indian rulers to have occupied it were the Marathas. In 1983, the Agra fort was inscribed as a UNESCO World Heritage site. It is about 2.5 km northwest of its more famous sister monument, the Taj Mahal. The fort can be more accurately described as a walled city. Built as a military structure in 1565 by Emperor Akbar with later additions by Shah Jahan, the stunning Agra Fort (also known as Agra's Red Fort) is an interesting mix of both Hindu and Muslim influences. This palace located in Karnataka state and center place of mysore city. the architectural style of this palace is "indo-saracenic" style. The European languages are members of the same family. Their separate existence is a myth. For science, music, sport, etc, Europe uses the same vocabulary. The languages only differ in their grammar, their pronunciation and their most common words. Everyone realizes why a new common language would be desirable: one could refuse to pay expensive translators. To achieve this, it would be necessary to have uniform grammar, pronunciation and more common words. If several languages coalesce, the grammar of the resulting language is more simple and regular than that of the individual languages. The. it is start to built in 1897 and this works end in 1912. It is a most famous tourist spot after Taj Mahal with more 6 million annual visitors. Located a little more than two kilometers from the Taj Mahal, the fort is entered through Amar Singh Gate with its low outer wall and dogleg design built to confuse attackers. Once inside, you'll see two large interlinked sandstone buildings, Akbari Mahal and Jahangiri Mahal, the largest private residence in the complex. for more details [Click here](#)

6.The Golden Temple

The Gurdwara is built around a man-made pool (sarovar) that was completed by the fourth Sikh Guru, Guru Ram Das in 1577. Guru Arjan, the fifth Guru of Sikhism, requested Sai Mir Mian Mohammed, a Muslim Pir of Lahore, to lay its foundation stone in 1589. In 1604, Guru Arjan placed a copy of the Adi Granth in Harmandir Sahib, calling the site Ath Sath Tirath. The Gurdwara was repeatedly rebuilt by the Sikhs after it became a target of persecution and was destroyed several times by the Muslim armies from Afghanistan and the Mughal Empire. The army led by Ahmad Shah Abdali, for example, demolished it in 1757 and again in 1762, then filled the pool with garbage and blood of cows. This palace located in Karnataka state and center place of mysore city. the architectural style of this palace is "indo-saracenic" style. The European languages are members of the same family. Their separate existence is a myth. For science, music, sport, etc, Europe uses the same vocabulary. The languages only differ in their grammar, their pronunciation and their most common words. Everyone realizes why a new common language would be desirable: one could refuse to pay expensive translators. To achieve this, it would be necessary to have uniform grammar, pronunciation and more common words. If several languages coalesce, the grammar of the resulting language is more simple and regular than that of the individual languages. The. it is start to built in 1897 and this works end in 1912. It is a most famous tourist spot after Taj Mahal with more 6 million annual visitors. Maharaja Ranjit Singh after founding the Sikh Empire, rebuilt it in marble and copper in 1809, overlaid the sanctum with gold foil in 1830. This has led to the name the Golden Temple. for mor details [Click here](#)
